Medical Center Parañaque I Philippines

Technology has made so many changes in the practice of ENT-HNS. Our patients have access to the latest devices and equipment our specialty uses. They will expect the state of the art diagnostic tools once they visit us in the clinics. My previous mentors have always reminded me that we should invest in instrumentation and equipment. Thru the years, I have heeded their advice in investing in equipment and machines.

Diagnostic centers in our clinic will definitely add efficiency and accuracy in our practice. We do not have to wait for our institutions to invest.

We should be the ones to invest in "state of the art technology". We both learn and profit in our Outpatient practice if we heed their advice. It is profitable in terms of learning experience aside from its financial gains.
